Mission

To empower, develop and deliver a skilled, agile, competitive and disease free society that provides skills that help marginalised people towards innovative rural and societal development.

Vision

Our vision is a world in which every marginalised person is empowered to enjoy access to an Injustice ,disease and biassed free society that is enshrined towards innovative rural development. We also seek a society of hope and injustice free attitude in which people live in dignity and harmony.

Our Activities :

There are few examples of social initiative activities done under Shyamli foundation which has benefited both the community and the company.

1. Education and Skill Development Programs:

- Offering scholarships, mentorship, and internship programs for students in the community.
- Providing vocational training and skill development programs to enhance employability.
- Collaborating with educational institutions to improve infrastructure and resources.

Community benefits: Improved access to quality education and increased job opportunities.

2. Environmental Conservation and Sustainable Practices:

- Implementing energy-saving measures within company operations.
- Promoting recycling and waste reduction initiatives.
- Supporting reforestation projects and conservation efforts.

Community benefits: Improved environmental conditions, conservation of natural resources, and sustainable development.

Company benefits: Reduced operational costs, enhanced reputation as an environmentally responsible firm, and potential access to environmentally conscious consumers.

3. Health and Wellness Campaigns:

- Organizing health camps and screenings for underprivileged communities.(Cancer awareness tests and Breast cancer screening)
- Supporting healthcare infrastructure and providing medical supplies.(free medicine distribution)
- Promoting healthy lifestyles and awareness campaigns.(hygiene training)

Our Activities :

Community benefits: Increased access to healthcare services, improved health outcomes, and awareness about health-related issues.(awareness camps)

4. Community Development and Infrastructure:

- Investing in infrastructure projects like building schools, community centers, or roads.
- Supporting initiatives that provide clean water and sanitation facilities.
- Renovating public spaces or parks.

Community benefits: Improved living conditions, enhanced civic amenities, and economic opportunities.

Community benefits: Increased volunteer support for community organizations and projects, leading to greater social impact.

These showcase how financial support initiatives can address diverse societal needs while benefiting the company. By aligning business goals with social and environmental objectives, companies can create sustainable value for both the community and themselves.

Credentials of Shyamli Foundation for CSR.

Shyamli Foundation is there with a charge and fighting for the cause. It's acting as one point destination for the work in the skill commission, discovery of the health issues, education for the poor and give a robust training to the marginalised and untapped people so that they can stand on their own, and can annihilate the poverty of their family and can work as frugality supporter for the nation.

Shyamli Foundation knows that there are numerous organisations and enterprises in India and abroad who want to work for the betterment of the society(CSR) but they're lacking with the genuine people where their profit can be duly utilised. Therefore, as a responsible part of the society, the Shyamli foundation is ready to help every establishment and diligence to feed their CSR exertion.

What are the projects undertaken ?

TRAININGS :

To train the marginalised and poverty driven people and make them professed in their separate disciplines so that they can stand out in the society and can feed the requirements of their families.

FREE HEALTH CHECK UP CAMPS :

A proper and early health check up camp is important so that it'll help us to describe the early complaint in which we weren't putting our attention and therefore what the Shyamli foundation is embedded to concentrate on this issue

SKILL DEVELOPMENT TRAINING FOR THE YOUTHFUL GENERATION :

Shyamli Foundation believes that everyone has come up with a certain kind of gift or chops. Just like a proper slice and dressing is needed for a gravestone to make a idol hence in the same way proper guidance and training is needed for the youthful generation so that they can fluently find out their chops and use it as the upliftment for their career and particular growth.

WOMAN AND CHILD WELFARE :

Women and children play a vital part in society and have to be treated as an important identity in the society because a woman is the foundation of the coming generation of family and a child is actually the future of the nation. It's necessary that every woman in India must be apprehensive about the government schemes which are made for them. It's also veritably necessary that proper care is taken for them.

WHAT PROJECT DOES THE SHYAMLI FOUNDATION CAN HANDLE UNDER CSR SYSTEMS?

- ◆ Water And Sanitation
- ◆ Woman Commission
- ◆ Training Depressed Women And Induce Employment
- ◆ Health Care-free Health Check Up Camps In Pastoral And Civic Areas
- ◆ Breast Cancer Webbing Projects
- ◆ Skill India Domestic Specialised Training Centres For Youth Employment
- ◆ Empowering Tribals To Learn Skills

WATER AND SANITATION :

Polluted water is always a main concern in India because it's a drinking carpet for the water borne complaint. Just for the information nearly 37.7 million citizens of India are being affected by waterborne conditions annually and according to the 2020 report of WaterAid India, 1 in every 10 people don't have access to a safe drinking water source which has put a serious intimidating situation for everyone.

The Shyamli foundation knows these causes veritably deeply and with the moxie of people from engineering and health sector they're fighting to give safe drinking water to everyone.

WOMAN EMPOWERMENT :

With around 6 plus years of experience in women empowerment Shyamli foundation knows that it's necessary to encourage the women so that they can know their rights and can work for the betterment of the family.

Yes it's true that if a woman is educated then she can give education to all in the families but, the Shyamli foundation believes that if woman is professed and working also then she can foster the profitable growth of the nation and can hoist the family in the society without demanding for any aid.

TRAINING DEPRESSED WOMEN & INDUCE THE EMPLOYMENT :

If a proper and useful training is given to the depressed women also it can open a path of growth to them as it can annihilate their poverty problem.

An Ideal investment in these sections will greatly profit depressed women girls to grow in the competitive world with having chops in their hands.

HEALTH CARE-FREE HEALTH CHECK UP CAMPS IN PASTORAL & CIVIC AREAS :

Early discovery of conditions or any other Medical Issue can be decrypted when a proper health check up camp is organised. Generally in the pastoral area the health care installation isn't over to that position and the lack of mindfulness for the complaint is also among the big challenges.

Shyamli foundation has done tremendous work in the health sector by arranging the Medical check up camp in the orphanages and also in the untapped pastoral areas.

BREAST CANCER WEBBING PROJECTS :

According to the National Library of Medicine, bone cancer has now come top among the four cancers which are there in India. With the estimated new case for cancer encyclopedically in 2020 around 24.5 women were affected by bone cancer. This has now become an intimidating situation encyclopedically.

Just to annihilate this and bring geography changes, the Shyamli foundation is ready to take up the first step in this cause with the support of everyone.

SKILL INDIA DOMESTIC SPECIALISED TRAINING CENTRES FOR YOUTH EMPLOYMENT :

Development in tribal societies should concentrate on educational programmes that motivate in keeping tribal youth integrated in their own culture and therefore what skill India domestic specialised training centres for youth development should be planted in the pastoral remote areas so that every community is greatly served with the skill development.

Shyamli foundation has done a tremendous part in upping the chops in everyone and especially among the people in the pastoral area.

EMPOWERING TRIBALS TO LEARN SKILLS :

The Shyamli foundation believes that the Tribals are the first citizens of the jungle because they do n't need any training to live because it's like a home to them but we Indian's actually do n't know that they've the precious and long history for their work and traditions. Right from food to their manufacturing and also in the apparel also.

The Shyamli foundation has always set up the camp and expositions to bring out the gift of tribal people to the world. But the chops and artisan knowledge which they have remains always unnoticed to the entire world, the Shyamli foundation has come forward to showcase the real gift of the lineage to the people with its moxie and and collaboration with the enterprises.
